Art Unit: 2618

Response to Arguments

1. Applicant's arguments filed 2/02/06 have been fully considered but they are not

persuasive.

The applicant argues that newly amended claim language overcomes the rejection of 35

USC 112, first paragraph. The examiner respectfully disagrees because at least the term of "have

a Q radiating element less than 1" is still not support by the original specification and also might

raise an issue of enablement.

The applicant argues that claimed capacitor sized to have a Q radiating element less than

1 is supported and can be found in the specification on page 5, lines 7 to 11. However, the

specification only states "simulations how that a typical Q is around 1". It doesn't specify less

than 1 and none of the figures has simulation indicate the Q factor.

Furthermore, it is physically impossible to have Q factor of capacitor in which one of the

crucial element of an antenna circuit (LC circuit) to be less than 1 because the Q factor directly

determines the filter bandwidth with a known carrier frequency. For example, if the loaded Q

factor of an antenna circuit is 20 and at 14MHz frequency, the bandwidth would be 700 kHz. If

the O factor is less than 1, the bandwidth of an antenna were exceed the carrier frequency in

which is impossible to achieve.

Therefore, the previous rejection under 35 USC 112, first paragraph stands.

DETAILED ACTION

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 2618

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. At least new added limitation, "have a Q radiating element less than 1", is still not support by the original specification.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2618

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yuwen Pan whose telephone number is 571-272-7855. The examiner can normally be reached on 8-5 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anderson D. Matthew can be reached on 571-272-4177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
